

Aesthet Reticulated HA MesoFiller

- Moderate wrinkles & skin plumping

for professional mesotherapy

Aesthet - advanced aesthetic skin care treatments • tested and recommended by Dermatologists

Aesthet Reticulated HA MesoFiller is a chemically crosslinked hyaluronic acid derived from a non-animal source. It has a unique non-equilibrium gel structure with gel domains that holds strongly bound water. The product is intended for aesthetic treatments of moderate wrinkles and skin volume.

It is recommended for treating wrinkled skin and skin plumping.

Administration: Transdermal mesotherapy. Administration of Aesthet Reticulated HA MesoFiller by use of transdermal mesotherapy has to be performed by aesthetically trained professionals.

Usage for Aesthet Reticulated HA MesoFiller:

Aesthet Reticulated HA MesoFiller can be used in a dosage of 10ml at a time, but not more than one treatment per month - irrespective of where it is applied.

If the product is used less than 10 ml at a time based on 2mg/cm²- up to 3 applications per week on facial parts, lips, neck and/or back of hands can be allowed.

Individual dosage of Aesthet Reticulated HA MesoFiller per one mesotherapy session depends on the method of the mesotherapy applied.

Warnings:

Some individuals can show sensitivity or delayed sensitivity. It is recommended to do a little test patch 24 hours or a week before treatment of individuals that indicate that

they are sensitive or prone to allergies.

Please note that some individuals, on consumption of spicy food, can show a reaction when using Aesthet Reticulated HA MesoFiller.

In case of skin sensitivity on the product stop usage and seek medical advice.

Contraindications for Aesthet Reticulated HA MesoFiller:

Hypersensitivity to any of the components of Aesthet Reticulated HA MesoFiller.

Ingredients:

Water, Pentylene Glycol, Sodium Hyaluronate Crosspolymer, Ethylhexylglycerin

Storage:

Please be advised that the shelf life of

Aesthet Reticulated HA MesoFiller is 2 years. This policy assumes that the product is stored unopened in a dry environment at around 25°C and kept out of direct sunlight.
