

# Aesthet Retinol Cream

skin resurfacing

50ml, code 811

Aesthet - advanced aesthetic skin care treatments

Aesthet Retinol cream is an antiaging cream containing active Retinol which has been stabilised with anti-oxidants to stimulate skin renewal, reduce uneven skin tone and the appearance of fine lines. This unique formula contains TighRenyl™, bio-technological complex which helps to rejuvenate the skin matrix and effectively smooth the skin surface. It consists from a combination of bioavailable sulphated glycosaminoglycans which act as skin bio-lifters improving firmness, tonicity and skin density. Omega-6,3 ceramides of raspberry seed oil and natural polysaccharides aid to restore skin moisture and the skin barrier cohesion. Heptapeptide-34 and Gorgonian extract serve to reduce the risk of flaking and irritation often associated with Retinol.

**Indication:** For the topical treatment of dry, damaged and ageing skin.

## Direction for use:

- Start application of Aesthet Retinol cream once every second or third day and increase it to once daily. Wear sunscreen preferably with a sun protection factor (SPF) of 30 or higher. DNA EPINEW Sunscreen SPF 30 is highly recommended.

FOR EXTERNAL USE ONLY.

100% fragrance free
