

# AESTHET PEPTIDE SKIN REFORMER

rejuvenating blocks for skin matrix

Aesthet - clinically proven advanced aesthetic skin care treatments • tested and recommended by Dermatologists

Aesthet Peptide Skin Reformer is a scientifically designed peptide solution that works to rejuvenate the skin's matrix during aesthetic treatments. It contains a patented blend of tailor- made innovative peptides that help to increase the synthesis of collagen, fibronectin, and hyaluronic acid.

Collagens are the most abundant proteins in the skin forming up to 75% of the skin's proteins. They are the large macro-molecules that ensure the skin's structure and firmness. With time the collagens level in the skin decrease and their function is reduced. Aesthet Peptide Skin Reformer helps to increase the formation of new, stable, and various collagens and rejuvenate the skin's matrix during aesthetic treatments. The tailor-made peptides in the formula boost dermal collagens I and III, collagen of the dermal-epidermal junction (DEJ), especially collagen IV, VII and XVII, so called anchoring collagens that are vital for the skin firmness and integrity. Aesthet Peptide Skin Reformer also helps boost the synthesis of fibronectin and hyaluronic acid. Aesthet Peptide Skin Reformer contains Delisens™ a new hexa- peptide that provides an immediate soothing effect on the skin, attenuating neurogenic inflammation and itch and contributes the speed recovery. It helps to recover the skin and skin's barrier function by stimulating human keratinocyte proliferation and restoring the damaged tissue integrity and re-epithelisation.

## Recommended for:

- Microneedling and hydrapen. Use Aesthet Peptide Skin Reformer after treatment as leave on application.
- Mesoskin and virtual mesotherapy. Aesthet Peptide Skin Reformer can be used for various Mesoskin treatments as mono or in combination with other serums.
- Other aesthetic treatments. Aesthet Peptide Skin Reformer can be used after various aesthetic treatments to help to rejuvenate and recover the skin.

## Application method:

- Aesthet retinol peel. Apply Aesthet Peptide Skin Reformer 2-3ml 5min after retinol peel application and leave on
- Aesthet Xpert peel. Apply Aesthet Peptide Skin Reformer 2-3 ml after washing out the Xpert peel and leave on. Apply stem cell masque, massage in and leave on.

## Side effects:

Unknown.
