

Aesthet Hair Advance ReSetter

Phyto-Peptidic Hair Bulb Fortifier

Aesthet - clinically proven advanced aesthetic skin care treatments • tested and recommended by Dermatologists

Aesthet Hair Advance ReSetter is a professional treatment that helps to revitalize the scalp and fight male and female hair loss. It contains a concentrated secretome of totipotent cells from the rhizome of Curcuma Longa rich in signaling peptides for epigenetic reset of the hair bulb and hair follicle rejuvenation.

A concentrated secretome of totipotent cells from the rhizome of Curcuma Longa, rich in signaling peptides has been specially designed to create the optimal micro-environmental to reactivate hair growth. It promotes an epigenetic reset of the hair bulb and hair follicle regeneration while nourishing it at the same time with an exclusive nutritive blend specially made for hair.

With a combination of the Bairapil TM complex, Hair Advance ReSetter enhances the metabolic activity of the cells to stimulate the hair follicles and strengthen the hair.

Bairapil complex in the Hair Advance ReSetter is a combination of three botanical active ingredients that act to visibly combat hair loss, stimulate hair growth, and increase its density. Bairapil helps gently change hair cycles from telogen to anagen phase and improves the condition of the follicular cells and their microenvironment to maintain the balance between anagen and telogen phases.

Another active ingredient in Aesthet Hair Advance ReSetter is obtained as an aqueous extract of Watercress (*Nasturtium officinale*) and Indian cress (*Tropaeolum majus*) leaves and shoots. Titrated with sulfur, it is designed to facilitate hair growth and strengthen hairs from the root by providing the elements (sulfur and other minerals) needed to produce keratin for solid, well-structured hair.

Polyphenol-rich extracts in Aesthet Hair Advance ReSetter were obtained from the aerial parts of the plant Yerba Santa. They optimally delay the aging of hair follicles and increases both hair growth and hair density with a caffeine-like energizing effect, also a potent antioxidant that reduces ROS at the cellular and hair follicle levels.

With a combination of other substances in the formula, Aesthet Hair Advance ReSetter helps to stimulate hair growth and hair re-densification as well as hair nourishing and strengthening.

Usage for Aesthet Hair Advance ReSetter:

Professional in-salon treatments are recommended every week over 3 consecutive months following the 2-month break and further 3-month treatments. The product can be used as a part of hair mesotherapy, virtual mesotherapy based on electroporation technology is highly advised.

A home regimen with retail Aesthet Hair Advance ReSetter is strongly recommended for the best results. Aesthet Hair Advanced ReSetter for home usage must be used daily at night without any interval of a break to follow the professional treatments.
